Qmos

Do you want to have picture galleries on your website or your blog? Are you a web designer and want to have a quick, customizable solution to create mosaics and pictures galleries? Qmos is your quick and elegant answer. Qmos is a small

---

application that lets you do these things fast and easy. Create your first mosaic: You can easily create your first mosaic with Qmos. Start by adding a folder of pictures into Qmos and select a target picture. Now you can easily save a picture mosaic using Qmos' drag and drop capabilities. With just one click, you can

---

generate a mosaic with a variety of additional options. Add pictures to your mosaic: Qmos is a full featured application. Just select pictures using your favorite file manager and add them into Qmos. Pick the size of your pictures and the number of pictures you want to add. Create a new mosaic to create new

---

pictures, or change an existing one. You can pick the method of your choice: - Tile by tile - By pictures - By color You can fine tune the selection, if you wish. Even if you do not, Qmos can automatically choose an image size depending on the number of pictures you have. You can also fine tune the size of the tiles.

---

Easily arrange your pictures:  
Once you have your pictures arranged the way you want them to be, you can add a border around the mosaic if you wish. You can also change the spacing between the tiles, which will result in a different look and a different feel. You can also set the way pictures are moved to

---

their new location. Use the standard or the adaptable method: After you have all your pictures arranged the way you wish them to be, you can create your mosaic with the standard or the adaptive method. In the standard method the pictures are arranged according to color. The pictures are placed by color next

---

to each other. The spacing between the pictures is the same for all pictures. In the adaptive method the pictures are arranged depending on the color of the picture. The spacing between the pictures is different for each picture. This method is more flexible and if you make a mistake with the selection of

---

pictures it is not as hard to fix as the standard method. You can export your mosaic in two ways: -  
JPG - HTML - Choose a mosaic preview You can also preview your mosaic as a JPG picture to see how the mosaic looks on your computer. You can then export the picture as
