"Raidancer, the Wild of the West, is the first full-length experience from Ape Law Games. An action-adventure, reminiscent of old-school platformers, where fast, brutal violence is the only answer. The cinematic opening of the game shows a young man trying to carry on his journey from his deathbed to the evil moose village of Talunga, where he'll have to defeat the three leaders to restore justice to nature. "As an old-school platformer, the game features multiple weapons which carry elemental effects. The weapons are dropped from defeated enemies, and can either be picked up again, or transformed into newly-crafted weapons by combining two of the same kind. "The controlled violence of Raidancer is fully justified, as the solution for every situation can be found in violence itself. This is a game which is easy to pick up, yet rewarding and challenging to master. "Raidancer is a traditional platforming game, with as much emphasis on puzzle-solving as it is on action. It's both hard as hell, yet with endless possibilities. "Play the game solo if you like, or with a friend if you want to team up and get stronger. Raidancer has two great co-op modes, local and online (not officially supported). "Raidancer will be released on PS4, Xbox One and PC on November 11, 2016. "It will be shown at PAX West."About Ape Law Games Ape Law Games was founded in 2011 by Glenn Matlock (Superbrothers). I am not the best at understanding games, so I will tell you how it's like in the comments section at the end of this update. Hello! I've had a rough time, because even though I have written a guide for the game, others on the forum haven't understood them and the resulting disappointment forced me to have a break. If that's a good cause to write something like this, feel free to continue. If not, I don't mind either. Here are some images.
