L.Profiles msplarson Posted a reply to "import Excel to MySQL - combine rows into a single field", on the site WordPress Support Forums:thanks for the quick reply, I am not able to change the settings that you said, the... 2 years ago Posted a reply to "I need to export the contents of an SQL table to a PDF file", on the site WordPress Support Forums:This is the procedure that I use. isai Posted a reply to "I need to export the contents of an SQL table to a PDF file", on the site WordPress Support Forums:just a simple easy step for you: Use Microsoft Access instead of MySQL....Q: Generate pdf image from php file using no format I am trying to generate a pdf image from a php file. I found this example from google: \$buffer = imagecreatetruecolor(100, 20); \$text="My PDF image"; imagestring(\$buffer, 5, 5, 5, \$text, "Arial", "", "center"); imagejpeg(\$buffer); But I don't know to get the text and image inside the buffer. How can I put the text from a php file inside the buffer. The file I wanna generate has to be "memory-friendly" so I can put the filename and other data from the source file to the buffer. In general. How can I create a pdf image from a php file? Please guide me. Thanks A: Create an image like this: What else may be involved in dengue pathogenesis? Dengue virus has been developed into a live attenuated vaccine for preventing deng
